GLENS FALLS, NY (May 23, 2022) – Flomatic® Valves is pleased to announce the new American Iron and Steel (AIS) compliant Air and Vacuum MAXIAIR® model is now available.

Featuring a strong fusion bonded epoxy coated ductile iron body and cover (including internal surfaces) with 316 stainless steel internals this product is designed with the operator in mind for ease of maintenance. Engineered to meet AWWA Standard C512 for clean water pumping applications. Features include a two-bolt Quick Access™ cover, corrosion resistant 316 stainless steel float and trim, resilient Buna-N seating, and full nominal pipe size threaded female inlet and outlet ports.

“In stock and ready to ship, our new AWWA C512 & AIS compliant MAXIAIR® Air/Vacuum valves are ideal for clean water applications that require air release and vacuum pipeline protection.” said Brian Allen, Engineering Manager at Flomatic® Valves. MAXIAIR® Air/Vacuum valves exhaust large quantities of air at system start-up and admit large quantities of air to provide pipeline vacuum protection when negative pressure develops during power failures or pipeline breaks.

For a more detailed look at the benefits and specifications of our MAXIAIR® model, visit our website [HERE](#) or view our 2022 product catalog [HERE](#). To learn more about our innovative product solutions, visit our website www.flomatic.com or contact Laura Jensen, [Marketing Communications Specialist](#), at (518) 681-3972.

For nearly 90 years, Flomatic® Valves has been associated with some of the largest water and wastewater projects in the world as a leader in the water and wastewater industry. Designing and developing a wide variety of valve products – from high quality check valves to automatic control valves ranging from 1 inch through 36 inch – Flomatic® Valves is an ISO 9001 and 14001 certified manufacturer offering comprehensive manufacturing solutions and a wide variety of AIS compliant valves.
